

## PROJECT DESCRIPTION

<b>PROJECT NAME:</b> Indian Point 2 Onsite cutting and loading and offsite disposal of four turbine casing inner shells.	
<b>Prime, Subcontractor, or Partner?</b> Prime, subcontracted to Babcock Services/Jingoli	
<b>Total Price:</b> \$~400,000	
<b>Work Description – General:</b> IMPACT Services, Inc. was contracted by the Indian Point Nuclear Power Plant to provide the safe and efficient segmenting, decontamination, and disposal of four turbine casing inner shells located at the Indian Point Site. Each casing shell weighed approximately 125,000 pounds and would have required overweight and oversized special permits to transport off site for processing and disposal. IMPACT, through its subcontractors, mobilized to the Indian Point site and provided the appropriately-trained personnel, equipment, and materials necessary to section the casing shells into 30,000 pound pieces. Once the casing shells were cut and sectioned, they were loaded onto trucks for standard transport to the IMPACT ETPP Facility with no special permits required. Specialized equipment, specially trained operators, and cranes were required for cutting and loading the six-inch steel pieces.  Once received at the IMPACT ETPP Facility, Health Physicists and Technicians removed the contaminated areas of the pieces using various decontamination methods. After final confirmatory surveys were performed, each turbine casing piece was free-released in strict compliance with IMPACT's radioactive material license and the U.S. NRC Regulatory Guide 1.86.  <b>All work was performed on schedule with no injuries or incidents, and IMPACT's all-inclusive solution saved the Indian Point Nuclear Power Plant over \$1,000,000.</b>	
<b>Location:</b> Indian Point Nuclear Power Plant, Buchanan, New York	
<b>Schedule Duration (including start/stop date):</b> 7/18/00 to 9/13/00	
<b>Client Name:</b>	Indian Point Nuclear Power Plant
<b>Address:</b>	Broadway & Bleakley Avenue Buchanan, New York 10511
<b>Contact:</b>	Mr. Rick Puddu
<b>Phone Number:</b>	(914) 734-5079
<b>IMPACT Point of Contact for this type of job:</b>	Joe Campanini
